A well-run foster program can increase the number and improve the quality of life of animals you save. Learn the keys to building a successful foster program for both shelters and rescues that can have a lasting positive effect.

**2:30 pm – 3:45 pm SHELTER MEDICINE 101**

*Stephanie Janeczko, DVM*

This workshop will review some of the common challenges shelters and rescue groups face in preventing infectious diseases and keeping the animals in their care healthy. We'll focus on tips and tools that are critical to improving health and welfare, including optimal animal care practices, strategies to reduce disease transmission, health examinations, vaccination protocols and sanitation procedures. A summary of available resources for further information will be provided as well as some time for Q&A to cover those topics most important to you.

**3:45 pm – 5 pm TRAINING SHELTER DOGS**

*Sue Sternberg*

Animal welfare professionals have a responsibility to provide true quality of life for each dog in their program. This workshop covers the importance of achieving and maintaining quality of life for dogs in shelters. Training, behavior modification programs, and mental, behavioral and emotional stimulation for dogs will be covered. We will explore some fun and easy ways to train adoptable dogs so they can put their best paw forward. Shelter dogs will be used for demonstration.
