HELPING PETS BY SUPPORTING PEOPLE: A COMPREHENSIVE APPROACH TO COMMUNITY WELFARE

KIM WOLF

In every community certain pets are more "at risk" for entering the shelter system and less likely to leave through the front door. But the animals are just one part of this story: for every pet that ends up in the shelter, there is a human component as well. This presentation will take a holistic approach to helping "at risk" animals by understanding the challenges and barriers facing people in our communities, especially those that threaten the human-animal bond. The presentation will show how a multidisciplinary approach can more accurately assess risk factors and identify opportunities for improvement. Drawing upon social work, economics, marketing, and public policy to help attendees assess their community's strengths and challenges, the presentation will share best practices from results-oriented groups around the country. By moving our discussions beyond animal welfare to community welfare as a whole, we can implement a comprehensive approach that benefits people and pets alike.
